Virus Research

Contents of Volume 40

Research Papers

M.D. Brown, M.A. Skinner (UK)
Coding sequence of both genome segments of a European 'very virulent' infectious bursal disease virus 1

R. Kehm, A. Rösen-Wolff, G. Darai (Germany)
Restitution of the UL56 gene expression of HSV-1 HFEM led to restoration of virulent phenotype; deletion of the amino acids 217 to 234 of the UL56 protein abrogates the virulent phenotype 17

M.K. Baxi, K. Borchers, T. Bartels, A. Schellenbach, S. Baxi, H.J. Field (UK, Germany)
Molecular studies of the acute infection, latency and reactivation of equine herpesvirus-1 (EHV-1) in the mouse model 33

M. Blixenkrone-Møller, G. Bolt, T.D. Jensen, T. Harder, V. Svansson (Denmark, The Netherlands, Iceland)
Comparative analysis of the attachement protein gene (H) of dolphin morbillivirus 47

X. Ge, S.W. Scott (USA)
The nucleotide sequence of hydrangea mosaic virus RNA 3 exhibits similarity with the RNA 3 of tobacco streak virus 57

K.L. Rhoades, S.H. Golub, J.S. Economou (USA)
The adenoviral transcription factor, E1A 13S, *trans*-activates the human tumor necrosis factor-α promoter 65

S. Zou, E.G. Brown (Canada)
Translation of the reovirus M1 gene initiates from the first AUG codon in both infected and transfected cells 75

A. Stokes, D.G. Alber, J. Greensill, B. Amellal, R. Carvalho, L.A. Taylor, T.R. Doel, R.A. Killington, I.W. Halliburton, D.M. Meredith (UK)
The expression of the proteins of equine herpesvirus 1 which share homology with herpes simplex virus 1 glycoprotein H and L 91

M. Takagi, K. Ishikawa, H. Nagai, T. Sasaki, K. Gotoh, H. Koyama (Japan)
Detection of contamination of vaccines with the reticuloendotheliosis virus by reverse transcriptase polymerase reaction (RT-PCR) 113

G.S. Sidhu, A.K. Singh, P.N. Raghunath, S. Sivaram, R.K. Maheshwari (USA, India)
Brefeldin A inhibits the antiviral action of interferon against encephalomyocarditis virus 123

U. Puurand, J.P.T. Valknonen, K. Makinen, F. Rabenstein, M. Saarma (Finland, Estonia, Finland, Germany)
Infectious in vitro transcripts from cloned cDNA of the potato A potyvirus 135

K.S. Burton, R.A. Consigli (USA)
Methylation of the polyomavirus major capsid protein VP1 141

E. Peerenboom, V. Jacobi, J.F. Antoniw, U. Schlichter, E.J. Cartwright, H.-H. Steinbiss, M.J. Adams (UK, Germany)
The complete nucleotide sequence of RNA-2 of a fungally-transmitted UK isolate of barley mild mosaic bymovirus and identification of amino acid combinations possibly involved in fungus transmission 149

F. Rodriguez, V. Ley, P. Gómez-Puertas, R. García, J.F. Rodriguez, J.M. Escribano (Spain)
The structural protein p54 is essential for African swine fever virus viability 161

S.N. Shchelkunov, A.V. Totmenin, L.S. Sandakhchiev (Russia)
Analysis of the nucleotide sequence of 23.8 kbp from the left terminus of the genome of variola major virus strain India-1967 169

O. Kranenburg, A.J. Van der Eb, A. Zantema (The Netherlands)
Induction of polyploidy in Adenovirus E1-transformed cells by the mitotic inhibitor colcemid 185

S. LaBoissiere, M. Trudel, C. Simard (Canada)
The bovine herpesvirus type 1 major tegument protein VP8 expressed in recombinant vaccinia virus does not induce significant immunity in mice 191

M. Haumont, A. Jacquet, M. Massaer, V. Deleersnyder, P. Mazzu, A. Bollen, P. Jacobs (Belgium)
Purification, characterization and immunogenicity of recombinant varicella-zoster virus glycoprotein gE secreted by Chinese hamster ovary cells 199
